## DUTCH ROMAN HYACINTHS Miniature or Dutch Roman

These may be planted close together in pots or boxes, also in beds in the open ground with charming effect. We can furnish them in the following colors:

Dark Red	Rose and Pink	Pure White	Dark Blue	Light Blue	All colors mixed
5 cents each; 50 cents per dozen, \$3.75 per hundred.					

## TULIPS

For gorgeous and showy colors the Tulip is unsurpassed. Beds of Tulips in contrasting or blended shades bursting into a mass of gorgeous bloom after a dreary winter are of indescribable beauty and attractiveness. In pots they force easily, requiring same treatment as for Hyacinths and produce best effects when 6 to 12 are planted in a pan or box together. For beds treat as for Hyacinths, setting the bulbs four to five inches apart, and three to four inches deep. If the soil is light plant deep, if stiff plant shallow.

The letters, a, b, c, following the varieties, indicate their earliness of bloom; the a's flower together, and are earliest, b next, etc. The figures indicate the height attained in inches, to aid in arranging flower beds.

Put about one-inch of sand in a shallow bowl or some similar vessel, about four inches deep; place the bulb on this, and pack it firmly with small pebbles or pieces of rock; then fill it with water to the top of the pebbles and place in a warm sunny window. The bulb will at once commence a rapid growth and bloom in five or six weeks. Add fresh water as often as necessary.
